

ILLUSTRATIONS.

PLATES.

	Page.
PHYSIOLOGY OF THE DIGESTIVE TRACT OF ELASMOBRANCHS:	
Plate I. (1 and 2) Photomicrographs showing structure of the rectal gland in the smooth dogfish.....	28
PHOTOGRAPHY OF AQUATIC ANIMALS IN THEIR NATURAL ENVIRONMENT:	
Plate II. (1 and 2) Photographs of fishes on coral reefs taken with camera submerged.....	43
III. (1) Photograph of the nest of a small-mouth black bass, taken with the aid of a screen, the camera above water. (2) Brook lampreys on the nest, photographed through water glass, in about 8 inches of running water.....	68
IV. (1) Water glass to be used for observation or photography of objects under water. (2) Two-foot water glass supported on four legs and provided with screen, as used for studying and photographing lampreys....	68
V. (1) Photograph showing the method of using the reflecting camera when inclosed in the water-tight box for subaquatic work. (2) Galvanized-iron box with plate-glass front, to contain a reflecting camera when used under water.....	68
RELATIONSHIPS OF THE FISH FAUNA OF THE LAKES OF SOUTHEASTERN OREGON:	
Map of the lake region of southeastern Oregon.....	102
FISHES OF THE SACRAMENTO-SAN JOAQUIN BASIN:	
Plate VI. Topographical map showing distribution of the Catostomidæ in the Sacramento-San Joaquin basin.....	148
FISHES OF THE COASTAL STREAMS OF OREGON AND NORTHERN CALIFORNIA:	
Map showing distribution of fluvial fishes in the coastal streams of Oregon and northern California.....	189
NATURAL HISTORY OF THE TEREDINIDÆ, OR SHIPWORMS:	
Plate VII. (1) Newly attached larva of <i>Xylotrya gouldi</i> . (2) Young shipworm of about 3 days' attachment, from ventral side. (3) Specimen of about 1 week in the wood, slightly contracted, ventral view. (4) Same stage as figure 3, from left side.....	232
VIII. (5 and 6) Young adult.....	232
IX. (7) Larva a few hours after attachment. (8) About the same stage as figure 2, from left side.....	232
X. (9) Same as figure 4, the left shell, mantle, and gill removed. (10) Adult, anterior half of body.....	232
XI. (11) Right shell valve of newly hatched larva, internal view. (12) Same, left shell valve. (13) Shell of newly attached larva. (14) Shell of shipworm that has been in wood about 1 day. (15) Left shell valve of specimen about 1 mm. long. (16) Left shell of specimen 5 mm. long. (17) Left shell valve of large adult. (18) Front view of shell of adult. (19) Internal view of right valve. (20) Left pallet of specimen 5 mm. long.....	232
XII. (21) Dorsal gland of posterior part of the mantle. (22) Sagittal section of newly attached larva.....	232
XIII. (23) Transverse section of larva. (24) Horizontal section of newly attached larva.....	232
XIV. (25) Transverse section of a specimen 1 mm. long. (26-30) A series of transverse sections of a specimen 10 mm. long.....	232
XV. (31-33) Continuation of series of transverse sections in Plate XIV. (34) Section of pallet handle and its sheath. (35, 36) Diagrams of the posterior end of body of adult.....	232
XVI. (37) Lamina of gill of <i>Teredo navalis</i> . (38) Transverse section of three laminae of <i>Xylotrya gouldi</i>	232
XVII. (39) Tangential section of a gill of <i>Xylotrya gouldi</i> . (40) Transverse section of three gill laminae. (41) Section of the three most anterior gill filaments at side of "head." (42) Group of cells from branchial groove at edge of gill. (43) Section of part of branchial groove that connects the two parts of the gill..	232
XVIII. (45) Section of two tubes of the gland of Deshayes from a gill lamina. (46 and 47) Coarser and finer portions of the dendritic processes from the gill lamina of <i>Teredo navalis</i> represented in figure 37. (48-51) Four stages in the development of the structures of the second factor of the gland of Deshayes.....	232
XIX. (52) Heart of a specimen 2 mm. long. (53) Heart of young adult. (54) Longitudinal section of the ventricle and vessels of a specimen 4 mm. long. (55) Longitudinal section of the anterior part of the ventricle and vessels of a specimen 10 mm. long. (56) Group of cells from main portion of style sheath. (57) Same from tubular portion. (58) Group of cells from the liver.....	232
XX. (59) Nervous system of newly attached larva. (60) Nervous system of adult. (61 and 62) Diagrams to show the relations of the ends of the kidneys, genital duct, pericardial cavity, and visceral ganglion....	232
XXI. (63) Transverse section of anterior ganglion and genital duct. (64) Longitudinal section of genital duct. (65) Section of osphradium. (66) Tangential section of the osphradium.....	232

TEXT CUTS.

FISHES OF WEST VIRGINIA:	Page.	FISHES OF SACRAMENTO-SAN JOAQUIN BASIN—Con't.	Page.
Rhinichthys bowersi	36	Figure 3. Cottus asperrima	144
PHOTOGRAPHY OF AQUATIC ANIMALS:		4. Cottus macrops	147
Figure 1. Diagram illustrating the photography of objects beneath the water by a camera above the surface	44	FISHES OF COASTAL STREAMS OF OREGON AND NORTHERN CALIFORNIA:	
2. Tripod top by means of which the camera may be inclined at any angle	47	Figure 1. Catostomus humboldtianus	164
3. Boutan's first apparatus	52	2. Ptychocheilus grandis, P. oregonensis and P. umpquaë, showing characteristic difference in size of scales which distinguishes the species	171
4. Boutan's second apparatus	54	3. Leuciscus caurinus	173
5. Boutan's third apparatus	55	4. Rhinichthys evermanni	178
6. Showing Boutan's method of obtaining instantaneous photographs of fish with his third apparatus	56	5. Hybopsis crameri	181
7. Showing Boutan's method of operating his third apparatus from a boat by means of a string	57	FISHES FROM ISLANDS OF THE PHILIPPINE ARCHIPELAGO:	
8. Boutan's apparatus for using a magnesium flash light under water	58	Figure 1. Muranichthys thompsoni	237
9. A reflecting camera shown in section	60	2. Pisoodonophis macgregori	238
FISH FAUNA OF LAKES OF SOUTHEASTERN OREGON:		3. Leiuranus lithinus	239
Figure 1. Diagram showing method of taking proportional measurements	79	4. Coecula mindora	239
2. Catostomus warnerensis	82	5. Barbodes hemictenus	242
3. Rutilus oregonensis	87	6. Atherina panatela	244
4. Rutilus columbianus	92	7. Doryrhamphus macgregori	246
FISHES OF SACRAMENTO-SAN JOAQUIN BASIN:		8. Hippocampus barbouri	247
Figure 1. Catostomus microps	121	9. Gnathypops dendritica	262
2. Diagram showing size of lips in Catostomus occidentalis from four localities	121	10. Abudedefduf sapphirus	264
		11. Congrogadus hierichthys	285
		12. Antennarius lithinostomus	286
